

<p>Health & Safety Institute® www.actnt-als.com</p>	<p>Health & Safety Institute (HSI), the largest privately held emergency care and response training organization in the world, joins together American Safety & Health Institute (ASHI), <i>MEDIC First Aid, 24-7 EMS, 24-7 Fire, EMP Canada, and First Safety Institute (FSI)</i>. Through more than 16,000 training centers and 200,000 professional emergency care, safety and health educators in the United States, Canada, and many countries around the globe, HSI companies have certified more than 13 million emergency care providers.</p> 
<p>Nationally Recognized?</p>	<p>HSI programs are accepted as equivalent to the AHA and American Red Cross (ARC) by state regulatory authorities, the National Registry of Emergency Medical Technicians (NREMT), the Department of Homeland Security/United States Coast Guard. HSI is nationally accredited by the Continuing Education Board for Emergency Medical Services (CECBEMS) and the National Registry of Emergency Medical Technicians (NREMT). Courses also meet the requirements for <i>Joint Commission on Accreditation of Healthcare Organizations (JCAHO)</i> & OSHA.</p>
<p>Intended Audience</p>	<p><i>Workplace</i> - For healthcare providers who require professional level Basic Life Support (CPR) certification or re-certification</p>
<p>Pre-requisites</p>	<p>None</p>
<p>ASHI-approved Training Materials</p>	<p>ASHI CPR Pro for the Professional Rescuer Student Handbook, either hard copy or digital (one per participant).</p>
<p>Successful Completion</p>	<p><i>Written Exam:</i> Required (77% or better) <i>Performance Evaluation:</i> Required for all (perform without assistance)</p> <ol style="list-style-type: none"> Place an unresponsive breathing victim in a recover position Perform effective rescue breathing with a pocket mask/BVM Perform effective chest compressions Perform effective CPR with 1 and 2 rescuers Safely and correctly attach and operate an AED Manage choking in the responsive and unresponsive victim
<p>Card Issued</p>	 <p>The image shows a sample of the 'CPR Pro For the Professional Rescuer' certification card. The card is titled 'ASHI APPROVED CERTIFICATION CARD' and includes fields for the Authorized Instructor (Print Name), Holder's Signature, Date Completed, and Renewal Date. It also features the American Safety & Health Institute logo and a note about the card's validity.</p>
<p>Certification Period</p>	<p>2 years.</p>
<p>Blended Learning</p>	<ul style="list-style-type: none"> • Cost-Effective: Reduce total costs associated with training. Much of the training can be completed outside of the traditional classroom. • Convenient: Blended Training offers an easier process for employees; students can train and prepare at times that are convenient for them. • Consistent: Both Knowledge and Skills Objectives are met through the HSI Blended Learning solution. Information presented online is the same material for all students ensuring that they are adequately prepared as a group to meet skill objectives. Certification is received after knowledge and skill objectives are reviewed by an Instructor. • Automated: Student and Instructors can automatically receive email notification regarding enrollment, follow-up, and completion associated with the training program. • Easy to Use: Self-directed, active experience that appeals to the adult student.  <p>The screenshot shows a web-based learning interface. At the top, there are navigation tabs for 'Courses', 'Library', 'Help', 'Settings', and 'Logout'. Below this is a video player with a 'Loading Video' message. To the right of the video player, there is text explaining the importance of an open airway: 'A=Airway. Open Airway. The airway is the passageway between the mouth and lungs. The airway must be open so air can enter and leave the lungs freely. Blockage of the airway in an adult or child is commonly caused by the tongue. To open the airway, tilt the head, and lift the chin.'</p>
