

Stroke Prehospital Care Online (Product #80-1468)

Frequently Asked Questions

Q: What is Stroke Prehospital Care Online?

A: Stroke Prehospital Care Online is a self-paced, interactive eLearning course designed to increase prehospital care providers' knowledge about the two types of stroke and demonstrate potential stroke-related complaints. This course teaches the pathophysiology and risk factors of stroke, as well as recognition, assessment, and management of potential stroke.

Q: Who is the intended audience?

A: Stroke Prehospital Care Online ideal for out-of-hospital medical professionals and emergency medical services (EMS) personnel in acute medical practice, but appropriate for any healthcare provider who wants to improve their knowledge of stroke treatment.

Q: What is the course format?

A: Through four interactive cases, course participants are presented with patients who have stroke-related complaints and are prompted to make prehospital management decisions. These cases must be successfully completed before a student is allowed to access the online test.

Q: What is the difference between this course and the other stroke eLearning courses available on OnlineAHA.org?

A: Stroke Prehospital Care Online differs from Stroke Hospital-based Care Online and Acute Stroke Online in the intended target audience. Stroke Hospital-Based Care Online and Acute Stroke Online are designed for in-hospital healthcare providers, while Stroke Prehospital Care Online is designed for EMS and other prehospital professionals.

Q: What are the unique features and benefits of Stroke Prehospital Care Online?

A: Below are some of the key features and benefits of this course:

Features

- Four interactive cases that include stroke-related patient encounters
