

BLS Healthcare Provider Online Renewal

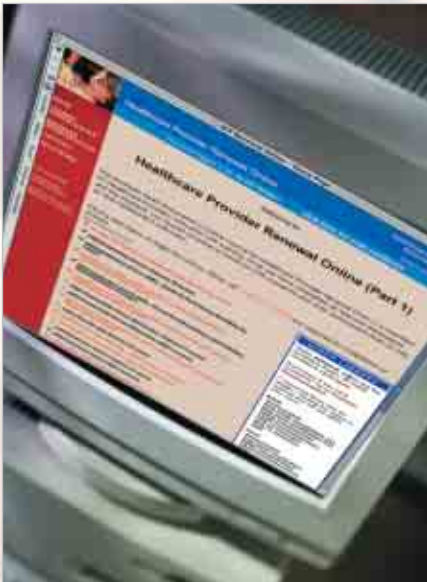

Healthcare Provider Online Renewal

- ♥ Looking for ways to improve and diversify your training curriculum?
- ♥ Want to minimize costs in your training programs while maintaining a high level of quality?

The American Heart Association's new Healthcare Provider Online Renewal course could be your answer.

We recognize that healthcare providers have knowledge and skills acquired over years of retraining and clinical experience. The new HCP Online Renewal Course allows the healthcare provider to complete many of the required course components over the internet.

Advantages

- Establishes a standardized training program
- Provides training when it is convenient for your staff (24 hours a day)
- Allows instructors to train more people with increased efficiency
- Designed for Healthcare Providers who have prior CPR training and need recertification

**When lives are at stake...
quality training makes a difference!**

About the Course

The course contains a series of online modules that cover the required adult, child, and infant CPR sequences:

- 12 checkpoints that must be completed
- 20 review sections and 19 videos that are optional

Participants usually require 1 to 2 hours to complete the online portion.

Course Components

- Complete Part I of the online portion for only \$15
- Go to an authorized AHA Training Center for the skills check, to complete Part II (Cost for the skills check is set by each individual Training Center)
- Receive an American Heart Association BLS-HCP certification card

Variable Products

- Individual program purchases
- Multiple key options
- Network and system programs

Insist on quality training from the American Heart Association, the leader in Emergency Cardiovascular Care programs.
